Safe Harbor East is a coalition of public and private agencies, under the umbrella of the Ventura County District Attorney's Office, created for the purpose of investigating violent crimes against children and adults, including child molest, child abuse, and adult victims of sexual assault. We also interview child witnesses to violent crimes, where they are safe and everyone who needs to know, is present. Our mission is to serve these victims, and their non-offending family members, with dignity and respect, and most importantly, to reduce the trauma of assault.
